Statement of Interest - Zellee Allen

It has always been my interest in helping people find quality, suitable housing to meet their life needs, especially people with intellectual/developmental disabilities. The philosophy and goals of the Fairvew Trust Committee align with my philosophy and goals. Together, we can expand that philosophy and help develop better communities for all people.

I believe my skills and work with a variety of groups can help pull together ideas, process, and planning to complete successful projects. It is when we work together that ideals come to fruition.
